Grade 9 EQAO Assessment of Mathematics

Key Words

Throughout the assessment, key words are used to identify the type of response required from you. The key words are explained below. Refer to this sheet to make sure you are responding fully to each question.

Compare:

Tell what is the same and what is different.

Describe:

Use words to create a mental picture for the reader.

Determine:

Use mathematics to find a solution to the problem.

List:

Use point form.

Explain:

Use words and symbols to make your solution clear.

Justify:

Give reasons and evidence to show your answer is correct.

Show your work:

Record all calculations and all the steps you went through to get your answer. You may use words, numbers, graphs, diagrams, symbols and/or charts.

Tools you should have access to:

- Pencil, ruler and eraser
- Scientific or Graphing calculator (You may not share with another student)
- Manipulatives (example: integer or algebra tiles)

Strategies for Multiple Choice Questions:

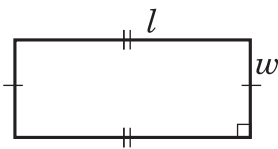

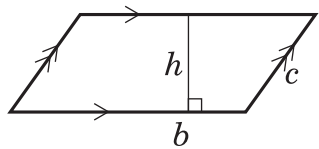

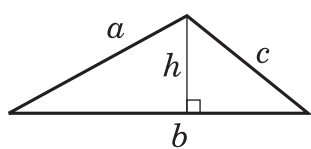

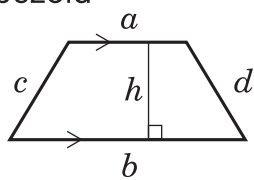

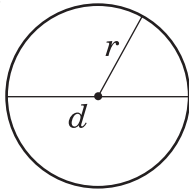

1. Cover the question choices and read the question stem carefully and highlight key words.
2. Look at the choices and eliminate any of the responses that are not possible.
3. There is only **one** answer per question. Choose the best possible answer and shade your choice on the answer sheet.
4. Answer every question, there are no penalties for guessing.
5. Question that have a graph are drawn to scale. Questions that have a diagram are usually not drawn to scale.

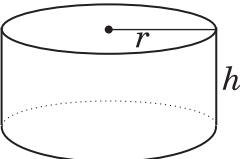

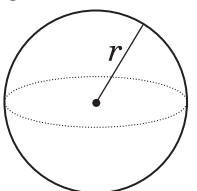

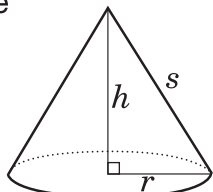

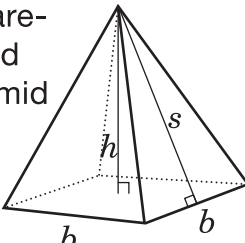

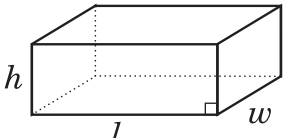

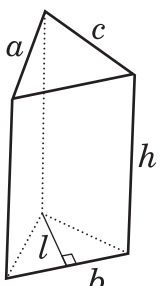

Strategies for Open Response Questions:

1. These questions are designed to get you to think deeply about the mathematics you know. Complete solutions including any rough work are expected for these questions.
2. Read the question carefully and highlight any key words or information.
3. Write your solution in the space provided.
4. Don't erase any of your calculations, drawing or reasoning.
5. Use the list of key words on the previous page to help you decide what is expected in your answer. For example, **explain** means to use words and symbols to make your solution clear and understandable.
6. The problems in these questions often have more than one way of being solved. Be sure to clearly explain your solution using pictures numbers and words.
